

AI Mentor for Silver Oak Juniors

Admin Guide

Complete administration guide for managing your school on Oakit.ai

Silver Oak Juniors | AI-Integrated Preschool
oakit.silveroakjuniors.in | School Code: soj

Table of Contents

1. Dashboard Overview	3
2. Login & Navigation	3
3. Users & Roles Management	4
4. Classes & Sections	5
5. Student Management	6
6. Curriculum & Textbook Planner	7
7. Supplementary Activities	8
8. Calendar & Daily Planner	9
9. Finance Module	10
10. Fee Structures & Collection	11
11. Salary & Expenses	12
12. Reports & Report Cards	13
13. Smart Alerts & AI Usage	14
14. Announcements & Audit Log	15
15. HR, Homework & Quizzes	16
16. Settings & Setup Wizard	17

1. Dashboard Overview

The admin dashboard gives you a real-time snapshot of your entire school's operations.

What You See on the Dashboard

Today's Attendance

Students present today, sections that submitted attendance, late submissions

Curriculum Coverage

Per-section coverage % with color bands: Green (75%+), Amber (40-75%), Red (<40%)

Teacher Engagement

Active/low/inactive teachers, plan completion rates, AI usage stats

Parent Engagement

Active parents, homework views, message stats, never-logged-in count

Fee Summary

Per-class fee assignment stats, pending collections, today's receipts

Birthdays & Alerts

Upcoming student birthdays with AI-generated wishes, fee alerts

Dashboard Actions

- Click any section's coverage to drill down into individual topics
- Click teacher names to see their daily breakdown
- Send birthday wishes directly to parents from the dashboard
- View sections that haven't submitted attendance yet

2. Login & Navigation

How to Login

- 1 Open browser: oakit.silveroakjuniors.in
- 2 Enter School Code: `soj`
- 3 Enter your mobile number and password
Default password = your mobile number (change on first login)

Navigation Sidebar

School

- Dashboard
- Users & Roles
- Classes
- Students
- Enquiries
- Homework
- Quizzes
- Uniform

Content

- Curriculum
- Textbook Planner
- Activities
- Calendar
- Daily Planner

Finance

- Finance Dashboard
- Fee Structures
- Fee Collection
- Concessions
- Expenses
- Salary
- Reports

Insights & System

- Reports
- Announcements
- Audit Log
- Smart Alerts
- Oakie Usage
- HR
- Settings

Finance items only appear if you have the relevant permissions enabled for your role.

3. Users & Roles Management

Manage all staff accounts, assign roles, and control access permissions.

Creating a New User

- 1 **Go to Users & Roles from sidebar**
- 2 **Click "Add User"**
- 3 **Enter name, mobile number, email**
Mobile number becomes their login ID
- 4 **Select role (Teacher, Principal, Admin, Staff)**
- 5 **Assign sections (for teachers)**
Select which class/section they teach
- 6 **Save**
Initial password = their mobile number

Managing Existing Users

- **Reset Password:** Click user > Reset Password. Resets to their mobile number.
- **Change Role:** Click user > Edit > Change role dropdown
- **Reassign Sections:** Click user > Edit > Update section assignments
- **Deactivate:** Click user > Deactivate. User can no longer login.
- **Class Teacher:** Assign one teacher as "Class Teacher" per section (manages parent communication)

Custom Roles & Permissions

Create custom roles with specific permissions:

- 1 **Go to Users & Roles > Roles tab**
- 2 **Click "Create Role"**
- 3 **Name the role and select permissions**
e.g., "Accountant" with only finance permissions
- 4 **Set portal access level**
Which portal the user sees when they login

Available Permissions

Finance

View fees, collect payments, manage structures, view salary, manage expenses, view reports

School

Manage students, classes, curriculum, calendar, announcements

System

User management, settings, audit logs, HR operations

Only admins can create other admin accounts. Teachers cannot access the admin panel.

4. Classes & Sections

Set up your school's class structure with sections and teacher assignments.

Creating a Class

- 1 Go to **Classes** from sidebar
- 2 Click **"Add Class"**
- 3 Enter **class name**
e.g., "Nursery", "LKG", "UKG", "Grade 1"
- 4 Save the class

Adding Sections to a Class

- 1 Click on the class name to expand
- 2 Click **"Add Section"**
- 3 Enter **section label**
e.g., "A", "B", "Morning", "Afternoon"
- 4 Save
Plans from existing sections can be auto-copied to new ones

Assigning Teachers

- 1 Click on a section
- 2 Click **"Assign Teacher"**
- 3 Select teacher from dropdown
Only shows teachers not already assigned to this section
- 4 Optionally mark as **"Class Teacher"**
Class teacher handles parent communication for this section

Class Settings

- **Day Start/End Time:** Set school hours for each class (affects attendance timing alerts)
- **Remove Teacher:** Unassign a teacher from a section
- **Delete Section:** Remove a section (only if no students assigned)

Set up classes and sections first before adding students or uploading curriculum. The order matters.

Deleting a section removes all associated plans and data. This cannot be undone.

5. Student Management

Add, manage, and organize all students in your school.

Adding a Single Student

- 1 **Go to Students from sidebar**
- 2 **Click "Add Student"**
- 3 **Fill in student details**
Name, date of birth, gender, class, section
- 4 **Add parent details**
Father/Mother name, mobile number, email
- 5 **Save**
Fee structure is validated automatically based on class

Bulk Import via Excel

- 1 **Click "Import Students"**
- 2 **Download the Excel template**
Pre-formatted with required columns
- 3 **Fill in student data in the template**
- 4 **Upload the filled Excel file**
- 5 **Review import preview and confirm**
System shows errors if any rows have issues

Student Photos

- Click on a student > Upload Photo
- Photos are stored in Supabase Storage
- Visible to parents in their portal

Parent Login Activation

- 1 **Select students (checkbox)**
- 2 **Click "Activate Parent Login"**
Creates login credentials for parents using their mobile number
- 3 **Parents can now login**
Username = mobile number, Password = mobile number (first time)

Use "Bulk Activate" to enable parent logins for an entire section at once.

Student Dashboard

- Per-class and per-section student counts
- Contact completeness (students missing parent mobile/email)
- Filter: incomplete parents, no photo, inactive parents

Other Actions

- **Reset Parent Password:** Resets to parent's mobile number
- **Link/Unlink Parent:** Change parent association
- **Transfer Section:** Move student to a different section

Always verify parent mobile numbers before activating logins. Wrong numbers mean wrong parents get access.

6. Curriculum & Textbook Planner

Curriculum Upload (PDF Ingestion)

Upload textbook PDFs so Oakie can generate lesson plans from your actual curriculum.

- 1 Go to Curriculum from sidebar**
- 2 Select the class**
- 3 Click "Upload PDF"**
- 4 Select your textbook PDF file**
- 5 Preview extraction (Week 1 sample)**
System shows a sample of extracted content before full processing
- 6 Confirm to start full ingestion**
AI extracts, chunks, and embeds the entire textbook

Ingestion takes 5-15 minutes depending on PDF size. You can monitor progress on the same page.

Managing Curriculum Chunks

- View extracted chunks by class or section
- Edit topic labels and content if extraction was imperfect
- Retry failed ingestions
- Delete and re-upload if needed

Textbook Planner

Create structured day-by-day teaching plans from textbook chapters.

- 1 Go to Textbook Planner from sidebar**
- 2 Create a planning session**
Select class and academic year
- 3 Add subjects to the session**
- 4 Upload textbook PDF per subject**
AI extracts table of contents into chapters automatically
- 5 Review and edit chapters**
Reorder, rename, delete, or add chapters manually
- 6 Set planning parameters**
School hours, teaching minutes per day, days per week
- 7 Generate plans**
AI creates day-by-day teaching schedule based on chapter weights

Additional Options

- **Import from Excel:** Upload chapters from a spreadsheet instead of PDF
- **Append TOC Pages:** Add more pages from the PDF if initial extraction missed some
- **Chapter Weights:** Adjust how many days each chapter gets based on difficulty

Upload curriculum before generating plans. Plans depend on curriculum chunks being available.

7. Supplementary Activities

Manage extra-curricular activities like Music, Art, PE, Dance, and Yoga with automatic scheduling.

Creating an Activity Pool

- 1 **Go to Activities from sidebar**
- 2 **Click "Create Pool"**
e.g., "Music Activities", "Art Projects", "PE Games"
- 3 **Add activities to the pool**
Each activity has a name and optional description
- 4 **Reorder activities**
Drag to set the rotation order

Assigning Pools to Classes

- 1 **Select a pool**
- 2 **Click "Assign to Class"**
- 3 **Select class and sections**
- 4 **Set frequency**
Weekly (e.g., every Monday) or interval-based (every 3 days)
- 5 **Save assignment**
Activities auto-rotate through the pool in order

How Rotation Works

- Activities cycle through the pool in the order you set
- Each section gets the next activity in sequence on their scheduled day
- The system tracks a "rotation cursor" per section
- If a day is a holiday, the activity shifts to the next working day

Managing the Schedule

- **View Monthly Schedule:** See which activity is assigned to which section on each day
- **Reschedule:** Move an activity to a different day if needed
- **Pool Summary:** View all pools with their current rotation position
- **Delete Activity:** Remove from pool (shifts remaining activities up)

Teachers see the scheduled activity in their daily plan automatically. No manual assignment needed each day.

8. Calendar & Daily Planner

Academic Calendar Setup

- 1 **Go to Calendar from sidebar**
- 2 **Set academic year start and end dates**
- 3 **Set working days**
Select which days of the week are school days (e.g., Mon-Sat)

Managing Holidays

- 1 **Click "Add Holiday"**
 - 2 **Enter date, name, and type**
Types: National Holiday, Festival, School Event, Vacation
 - 3 **Save**
Plans are automatically skipped on holidays
- **Bulk Import:** Upload holidays from a spreadsheet (date + name columns)
 - **PDF Export:** Download the full year calendar as a PDF for printing
 - **Special Days:** Mark celebration days (not holidays but special events)

How Calendar Affects Plans

- No plans are generated for holidays
- Teachers cannot mark attendance on holidays
- Homework cannot be sent on holidays
- Activities auto-shift to next working day

Daily Planner

View and manage AI-generated day plans across all sections.

- 1 **Go to Daily Planner from sidebar**
- 2 **Select class and section**
- 3 **View generated plans by date**
See topics, activities, and completion status

Plan Management Actions

- **Generate Plans:** Trigger plan generation for a date range
- **Edit Plans:** Modify topics or activities for a specific day
- **Delete Plans:** Remove plans for a date range (regenerate later)
- **View Completion:** See which teachers have marked their plans as done

Plans are generated automatically based on curriculum and calendar. You only need to intervene if something needs adjustment.

Deleting plans removes teacher completion records for those days. Use with caution.

9. Finance Module

Complete financial management for your school - fees, salary, expenses, and reporting. Access is permission-gated.

Finance Dashboard

Today's Collections Total fees collected today across all payment modes	Total Pending Outstanding fee balance across all students
Reconciliation Cash and online payments pending reconciliation	Recent Transactions Latest payment receipts with student name, amount, mode

Finance Navigation

- **Fee Structures** - Define what fees each class pays
- **Fee Collection** - Record payments from parents
- **Admissions** - Financial tracking for new admissions
- **Concessions** - Manage discounts and waivers
- **Expenses** - Track school expenditures
- **Salary** - Staff salary management (PIN-protected)
- **Reports** - Financial reports and analytics
- **Reconciliation** - Match payments with bank records
- **Profitability** - Revenue vs expense analysis

Enabling the Finance Module

The finance module must be enabled in Settings before it appears in the sidebar:

- 1 **Go to Settings**
- 2 **Find "Financial Module" toggle**
- 3 **Enable it**
Finance items now appear in the sidebar for users with finance permissions

Permission Requirements

VIEW_FEES See fee dashboard, student balances	COLLECT_PAYMENT Record fee payments, issue receipts
MANAGE_FEE_STRUCTURE Create/edit fee structures	MANAGE_CONCESSION Grant fee discounts to students
VIEW_SALARY Access salary records (PIN required)	VIEW_REPORTS Access financial reports and analytics

Salary data is additionally protected by a PIN. Even with VIEW_SALARY permission, users must enter the salary PIN to access records.

10. Fee Structures & Collection

Creating a Fee Structure

- 1 **Go to Finance > Fee Structures**
- 2 **Click "Create Fee Structure"**
- 3 **Select class and academic year**
- 4 **Add fee heads**
e.g., Tuition, Admission, Transport, Books, Uniform, Activity
- 5 **Set amount for each head**
Monthly, quarterly, or annual amounts
- 6 **Save structure**
Automatically assigned to students in that class

Collecting Fees

- 1 **Go to Finance > Fee Collection**
- 2 **Search for student by name or class**
- 3 **View pending balance**
Broken down by fee head and month
- 4 **Enter payment amount**
- 5 **Select payment mode**
Cash, UPI, Bank Transfer, Cheque, Online
- 6 **Submit payment**
Receipt generated automatically

Managing Concessions

- 1 **Go to Finance > Concessions**
- 2 **Select student**
- 3 **Choose concession type**
Percentage discount, fixed amount, or specific fee head waiver
- 4 **Enter amount/percentage and reason**
- 5 **Approve and save**
Student's pending balance updates automatically

Cash Reconciliation

- End of day: reconcile cash collected vs system records
- Record any variance with explanation
- Online reconciliation: match bank credits with system payments

Set up fee structures before adding students to a class. New students automatically get the class fee structure assigned.

11. Salary & Expenses

Salary Management

- 1 **Go to Finance > Salary**
- 2 **Enter salary PIN**
Additional security layer for sensitive data
- 3 **View staff salary records**
Monthly breakdown per staff member

Salary Configuration

- **Set base salary** per staff member
- **Add components:** Basic, HRA, DA, Conveyance, Special Allowance
- **Deductions:** PF, ESI, Professional Tax, TDS
- **Generate payslips:** Monthly salary slips for each staff member
- **Salary computation:** Auto-calculate based on attendance and leave

Staff members can view their own salary slips from their "My HR" section. They cannot see other staff salaries.

Expense Tracking

- 1 **Go to Finance > Expenses**
- 2 **Click "Add Expense"**
- 3 **Enter details**
Date, category, amount, description, vendor
- 4 **Attach receipt (optional)**
Upload photo or PDF of the bill
- 5 **Save expense**

Expense Categories

Operations

Rent, utilities, maintenance, cleaning

Supplies

Stationery, books, teaching materials

Staff

Salary, bonuses, training, travel

Events

Celebrations, field trips, competitions

Infrastructure

Furniture, equipment, repairs

Other

Miscellaneous, petty cash

Financial Reports

- **Daily Collection Report:** All payments received today with mode breakdown
- **Student Pending Report:** Outstanding balances per student/class
- **Reconciliation Report:** Cash vs system variance history
- **Profitability:** Revenue (fees) vs Expenses analysis by month

Run the profitability report monthly to track school financial health.

12. Reports & Report Cards

Student Reports

- 1 **Go to Reports from sidebar**
- 2 **Select report type**
Individual Student / Section / School-wide
- 3 **Choose class, section, and date range**
- 4 **Generate report**
Shows attendance, coverage, milestones, observations

Report Types

Individual Student

Complete profile: attendance %, topics covered, milestones achieved, teacher observations, parent engagement

Section Report

All students in a section with comparative stats, attendance trends, coverage progress

School Summary

School-wide metrics: total students, avg attendance, coverage by class, teacher performance

Report Cards

AI-generated progress reports with rich learning summaries for parents

Generating Report Cards

- 1 **Go to Reports > Report Cards**
- 2 **Select class, section, and term**
- 3 **Check observation readiness**
System shows which students have enough observations
- 4 **Generate report cards**
AI creates personalized progress summaries per student
- 5 **Review and approve**
Edit AI-generated text if needed
- 6 **Share with parents**
Download PDF or send directly through the app

Observation Categories for Report Cards

- **Cognitive:** Problem-solving, memory, logical thinking
- **Language:** Vocabulary, communication, reading readiness
- **Social:** Sharing, cooperation, group participation
- **Emotional:** Self-regulation, confidence, empathy
- **Motor Skills:** Fine motor (writing, cutting) and gross motor (running, jumping)
- **Creativity:** Art, imagination, original thinking
- **Participation:** Class engagement, following instructions
- **Behavior:** Discipline, respect, peer interaction

Report cards require teachers to have added observations throughout the term. Alert teachers early if observations are missing.

Reports are saved to the database and can be accessed later without regenerating.

13. Smart Alerts & AI Usage

Smart Alerts

AI-computed intelligence alerts that highlight issues requiring your attention.

Alert Categories

Teachers Not Completing Plans

Teachers with broken streaks, unlogged days, or consistently late completions

Low Attendance Trends

Sections where 7-day rolling attendance drops below 70%

Curriculum Behind Schedule

Classes with coverage below 40% - falling behind on syllabus

Weak Subject Detection

Subjects where quiz average scores are below 50%

Teacher Performance Scores

Multi-factor scoring for each teacher based on:

- **Plan Compliance:** % of days with plans marked as done
- **Attendance Marking:** Timeliness and consistency
- **Homework Sent:** Frequency of homework communication
- **Teaching Streak:** Consecutive days of completion
- **AI Engagement:** How often they use Oakie for teaching help
- **Observations:** Number of student observations recorded
- **Parent Communication:** Journey notes and messages sent

Teacher Performance Drill-Down

- Click any teacher to see daily breakdown
- View homework submissions by week
- AI usage patterns (which questions they ask)
- Engagement metrics over time

Oakie AI Usage

Monitor and manage your school's AI credit consumption.

1 Go to Oakie Usage from sidebar

2 View credit wallet balance

Current credits remaining

3 Check usage breakdown

Monthly call count, cost per call, usage by endpoint

What You See

- **Wallet Balance:** Current AI credits available
- **Lifetime Usage:** Total credits consumed since school onboarding
- **Daily Chart:** 30-day usage graph showing daily AI calls
- **By Endpoint:** Which features consume the most credits (chat, plans, formatting)
- **Recharge History:** Past credit purchases and dates

Monitor AI usage weekly. If credits are running low, teachers will be unable to use Oakie chat.

14. Announcements & Audit Log

Creating Announcements

- 1 **Go to Announcements from sidebar**
- 2 **Click "Create Announcement"**
- 3 **Enter title and message**
- 4 **Select target audience**
All users, Teachers only, Parents only, or specific class
- 5 **Set expiry date (optional)**
Announcement auto-hides after this date
- 6 **Publish**
Appears immediately for the target audience

Managing Announcements

- Edit published announcements (updates immediately)
- Delete announcements that are no longer relevant
- View which announcements are active vs expired

Audit Log

Complete activity log for oversight and compliance.

What the Audit Log Tracks

File Uploads

All PDF uploads, student photos, attachments with user and timestamp

Messages

Parent-teacher messages for admin oversight (content visible)

AI Queries

All Oakie chat queries with user attribution and responses

Safety Alerts

Flagged AI queries that may contain inappropriate content

How to Use the Audit Log

- 1 **Go to Audit Log from sidebar**
- 2 **Select log type**
Uploads / Messages / AI Queries / Safety Alerts
- 3 **Filter by date range or user**
- 4 **Review entries**

Safety Alerts

- AI automatically flags queries that may be inappropriate
- Review flagged queries and dismiss false positives
- Take action if a teacher/student is misusing the AI

File Cleanup

- View expired uploads (class notes older than 14 days)
- Manually trigger cleanup to free storage space

Review safety alerts weekly. Most are false positives, but it's important to catch genuine misuse early.

15. HR, Homework & Quizzes

HR Management

Manage leave requests, offer letters, and resignations.

Leave Requests

- 1 **Go to HR from sidebar**
- 2 **View pending leave requests**
Shows staff name, dates, leave type, reason
- 3 **Approve or Reject**
Add a review note explaining your decision

Offer Letters

- View all generated offer letters
- Download as PDF
- Track status (draft, sent, accepted)

Resignations

- View resignation submissions from staff
- Acknowledge receipt
- Track notice period and last working day

Homework Oversight

- 1 **Go to Homework from sidebar**
- 2 **Filter by date, class, or section**
- 3 **View all homework sent by teachers**
See content, time sent, and which teacher sent it

This gives you visibility into what teachers are sending to parents without interfering with their workflow.

Quizzes

- 1 **Go to Quizzes from sidebar**
- 2 **View all quizzes across the school**
Question count, total attempts, average score
- 3 **Click a quiz to see per-student results**
Individual scores, time taken, correct/incorrect breakdown

Uniform Sizing

- 1 **Go to Uniform from sidebar**
- 2 **View sizing requests from parents**
Student name, size selected, date requested
- 3 **Update status**
Pending > Confirmed > Dispatched > Delivered
- 4 **Add admin notes if needed**

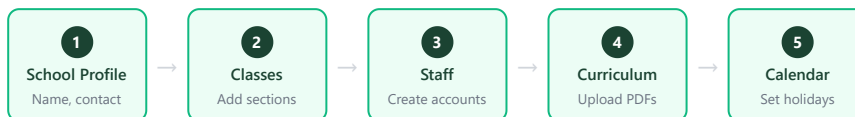

Use the homework view to ensure teachers are sending age-appropriate, well-formatted homework to parents.

16. Settings & Setup Wizard

Setup Wizard (First-Time Onboarding)

Guided step-by-step setup for new schools:

The wizard tracks completion progress. You can skip steps and return later.

School Settings

- 1 Go to Settings from sidebar
- 2 Configure school profile and features

Available Settings

School Profile School name, contact number, address, email	Branding Upload school logo, set primary color, tagline, Instagram handle
AI Plan Mode Standard vs AI-enhanced plans. Can override per class.	Feature Toggles Enable/disable: Voice input, Translation, Financial module, Student portal
Notes Expiry Set how many days class notes are kept before auto-deletion (default: 14)	Terms Define school terms with date ranges (Term 1, Term 2, Annual)

AI Plan Mode Options

- **Standard:** Plans generated from textbook planner chapters only
- **AI-Enhanced:** Plans enriched with AI-suggested activities, games, and teaching tips
- **Per-Class Override:** Set different modes for different classes

Time Machine (Testing Only)

- Override the system date for testing purposes
- Useful for testing plan generation, attendance rules, and calendar logic
- Set a mock date with TTL (auto-expires after set time)
- Clear override to return to real date

Time Machine is for testing only. Never use in production with real teacher/parent data active.

Enquiries

- 1 Go to Enquiries from sidebar
- 2 View all admission enquiries
Status: Open, Converted, Closed
- 3 Update status and add follow-up notes

You're all set to manage your school with Oakit.ai!

For support, contact the Oakit team or use Oakie chat for quick help.
